## Specifications

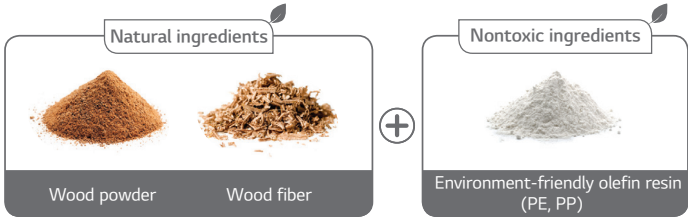

Dimensions : 20mm(T)×140mm(W)×2,800mm (L)

## Environment-friendly Safety

**Woozen is composed of natural and non-toxic material.**

- 70% or more natural material wood chip (Wood Fiber) is applied.

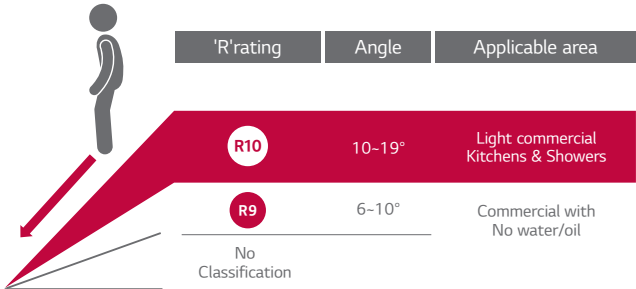

## Slip resistance

R10

**Slip resistance**

- 19° Angle of inclination
- Greasy condition with Oil

## **Composed of natural and non-toxic materials**

- Premium product with 70% or more natural material wood chip applied
- Uses non-toxic material, environment-friendly, olefin resin (PE, PP)
- Almost no harmful material generation for safety from skin diseases, etc.

## **Strong resistance against heat and moisture, less discoloration and contamination**

- Strong resistance against water, so no worry for use of water
- High dimension stability against heat and moisture
- Strong resistance against mold compared to wood and other synthetic wood

## **Various colors and realistic raw wood feeling**

- Excellent walking feeling with raw wood texture and surface embossing
- Presents luxurious interior space
- Same feeling as wood with wood grain embossing application

## **Outstanding performance compared to existing products based on technological power**

- Wood Fiber is used for strong mechanical strength
- Not broken even by strong shock
- High abrasion resistance compared to wood and other synthetic wood

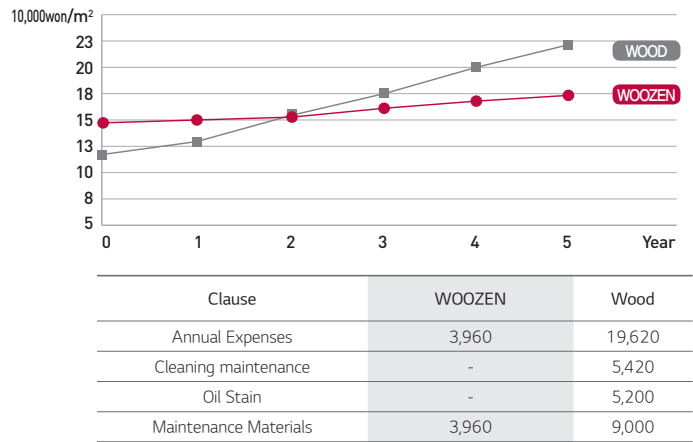

## **Excellent cost-saving advantages with convenient maintenance**

- Dust removal : water cleaning, soft brush, vacuum/steam cleaner can be used

High quality

High-quality product with outstanding durability and differentiated technology.

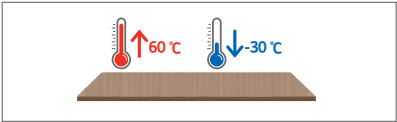

• Lifetime Cost comparison

• WOOZEN WFC 20T product presents better quality than its competitor's product WPC 25T product.

• WOOZEN WFC has great dimensional stability.

※ Linear thermal expansion  
coefficient test value :  $5.0 \times 10^{-3} (1/^\circ\text{C})$
