

HIMACS Returns to the Spotlight at the FX Design Awards 2025

HIMACS once again took centre stage at the FX Design Awards 2025, as winners received their coveted trophies made from thermoformed HIMACS solid surface.

Recognised as one of the most prestigious events in the interior design calendar, the FX Awards bring together leading British and international design talent to celebrate the very best in interior products and projects. The black-tie gala evening took place on 26 November 2025 at the iconic Grosvenor House, Park Lane, London, offering a memorable opportunity for the global design community to reflect on a year of creativity, innovation, and excellence.

LX Hausys was proud to sponsor the event once again, providing the distinctive, magazine-shaped trophies engraved with the winners' names. Elegant and tactile, the

HI·MACS

awards were thermoformed from HIMACS, measuring 310 x 240 mm, and designed to echo the instantly recognisable form of *FX Magazine*.

The trophies were created in the deep shade Aurora Midnight from the Aurora and Marmo collection and Ruby from the Lucent collection, highlighting both the aesthetic quality and technical performance of HIMACS. The material's ability to seamlessly combine form, function, and durability makes it equally suited to refined objects and ambitious, award-winning interiors.

Martin Saxby, Country Manager for HIMACS UK, commented:

"The FX Awards are a true celebration of the creativity and talent within our industry. We are delighted to support this prestigious event once again and to present winners with trophies that reflect the same level of ambition, precision, and beauty as the projects being honoured. We hope these pieces will be treasured for years to come."

HIMACS

The shape of your ideas

www.lxhausys.com/eu/himacs

HIMACS is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high-performance wall cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering many advantages over conventional materials.

HIMACS provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders and David Chipperfield**, among others, have completed fabulous projects using HIMACS.

At the forefront of innovation as always, LX Hausys recently introduced two new products. First, **HIMACS Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation in the history of Solid Surface since its inception in 1967. And now, **HIMACS Intense Ultra** combines the characteristics from two disparate worlds: **Intense Colour Technology** and **Ultra-Thermoforming**.

HIMACS uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades – exhibits a special translucency when exposed to light. Although HIMACS is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HIMACS is made using a next-generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HIMACS apart from other solid surfaces and creates a denser surface that is even sturdier, more homogeneous and more durable, and with better resistance and superior thermoforming results.

HIMACS does not absorb humidity, is highly resistant to stains and is easy to clean, maintain and repair.

Countless internationally recognised certificates attest to the quality of HIMACS in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for the Alpine White S728 colour.

HIMACS offers a 15-year warranty for products fabricated by a Quality Club Member.
