## Certification that Non-use of Chemical Elements

- We do not use the investigation substance category of ② for raw material and a manufacturing process intentionally in the investigation product for ①, and we prove that more than the threshold level does not contain.
- In addition, it is the passage of ③ when there is intentionally added and impurities content substance (un-intentionally added).
- When change and a doubt arise to this case from now on, we report it to you without delay.
- Moreover, we agree to bring forward the evidences and test reports which copied this case to your customer.

### ① Investigation Product

| No | Product Name (for investigation) | No | Product Name (for investigation) |
|----|----------------------------------|----|----------------------------------|
| 1  | LP80990                          | 2  |                                  |

### ② Investigation Substance Category / Threshold Level

| No | Name, symbol, number                 | Threshold level |
|----|--------------------------------------|-----------------|
| 1  | Cadmium, Cd                          | Not added       |
| 2  | Lead, Pb                             | Not added       |
| 3  | Mercury, Hg                          | Not added       |
| 4  | Chromium (VI) Compound, C6+          | Not added       |
| 5  | Polybrominated biphenyl, PBB         | Not added       |
| 6  | Polybrominated diphenyl ethers, PBDE | Not added       |

### ③ Intentionally Added / Impurities Content Substance

| Product Name               | No               | CAS No | Content substance name      |                |
|----------------------------|------------------|--------|-----------------------------|----------------|
|                            |                  |        |                             |                |
| Maximum content rate (ppm) | Application area |        | Purpose of use/Intended use | Abolition plan |
|                            |                  |        |                             |                |
