

# HI.MACS

The shape of your ideas

## May we introduce?

HIMACS – the material of infinite  
possibilities and creative ideas for  
unique living experiences

 LX Hausys

# Some basic things you need to know about HIMACS.

Just three ingredients are used to enable the endless possibilities of HIMACS:  
Yes, it's as simple as that.

# Sustainability begins with the mind

It may sound like a truism, but we need to remember it nevertheless. **Because every step towards sustainability is an important step.** For example: Process every little piece instead of throwing it away? Let's start an initiative! Energy saving in logistics possible? Yes, we find ways to make it possible! Environmentally friendly packaging? We are on it! Research and development work for future environmental optimisation? Absolutely! We work tirelessly to become even more sustainable day by day. Certified!

Use of recycled raw materials?  
Wherever possible!

# Sustainable. And able to sustain.

## HIMACS is ...

- ⇒ Used in installations that need to be visually attractive, and technically **extremely durable**.
- ⇒ Very **easy to maintain** – water, cloth, scouring sponge, mild detergent: that's it more or less.
- ⇒ **Easy to repair.**
- ⇒ Every part of HIMACS can still somehow be used for something useful. There is no waste.
- ⇒ **Composed of high quality materials** and free of silica, formaldehyde, VOC emissions and nanoparticles.
- ⇒ Produced in an **energy-efficient and resource-saving** manner.

# One material. Infinite options.

## Standard Formats in mm

**760 x 2490**  
Thickness: 6

**930 x 3000**  
Thickness: 4.5

**760 x 3680**  
Thickness: 9, 12

**1350 x 3680**  
Thickness: 6, 9, 12

**910 x 2490**  
Thickness: 6

**910 x 3680**  
Thickness: 9, 12

**1520 x 3680**  
Thickness: 12

HIMACS is available as **sheet material** in various thicknesses and different dimensions. The perfect adhesive, helpful accessories, training, etc. – we provide everything you need to get started.

# Benefit from the mega-flexible product range.

HIMACS is available as pre-cast  
sinks and basins for the kitchen,  
bathroom and other applications –  
there is a **standard range** and  
**the ability to realise your own  
design ideas.**

Design: Sebastian Barlitsch - Fabrication: Avangarde Surfaces - Photo: Ciprian Stoian

## Tight curves

HIMACS can be **thermoformed**. You are going to love this: heat the material up (e.g. in a laminate press) and mold it into any shape you like.

## XXXL surfaces

You can bond one sheet of HIMACS to the next. You could easily build entire football fields from it! The icing on the cake - **no visible seams**.

## Brilliant light effects

**HIMACS is translucent.** Just shine a light behind a piece and experience it for yourself. And now start dreaming what's possible!

## United colours of fabulous

HIMACS is available in **about 100 colours**. Each one more beautiful than the next! Combine it with wood, glass, brass, copper ... you get the idea.

# More outstanding stuff. And how you make it happen.

## The details people fall in love with

A backlit starry sky, a small seamless shelf, a gentle trough. You make it up as you go along. And **build it in HIMACS**: Drill it, saw it, mill it, glue it, whatever you want. Like hardwood.

## Highly functional shapes and bowls

Single basins, double basins, round basins. Kitchen sinks, washbasins, bathtubs or shower trays. **Everything can be integrated without visible joins**. As undermount or topmount versions. Same material – same uni colours – always fits perfectly.

## From high gloss to noble matt

HIMACS can be sanded into different finishes with an orbital sanding machine. **High gloss**, **satin**, whichever you prefer. Either way: HIMACS is a tactile champion, and always soft to the touch.

Natural colour and material mix. Straight lines.

Highly functional countertop with **flush integrated spacious sink**.  
What more could you want?

**The complete house facade** made of **HIMACS**. Made to last for years, come rain or shine.

A hotel room like a fantastic dream. **Thermoforming, flush connected, light effects** – isn't it exciting!

This bar really shows off the **translucency** property of HIMACS.

Design: Yonseux Architectes, France, yonseux.com – Fabrication: ASKA Interior, France, aska-interior.com – Photo: Alexandra Mocanu

In hospitals, what counts above all is **maximum hygiene**. And if the seamlessly integrated super-spacious basins also look good, all the better.

Design: NAU Architecture, Switzerland, dreyercouinandjauffarchitecten, Switzerland, naucoop.ch – Fabrication: Wallcovering patterns design: ROK, Rüppmann Oesterle Krauss, Switzerland, rokoffice.com – Wallcovering and Joinery: Gläser Baden, Switzerland, glaeser.ch – Photo: Jan Bitter

Thermoformed **wall-claddings** in one of Paris' coolest indoor pools.

This counter in a bank in Zurich conveys **respectability**. And through the milled heads of the founders, also half of the company history. Perfect!

# What we can prove and guarantee

Those who are convinced of something, we are talking about "really convinced!", have no trouble guaranteeing that it will last for a long time. We totally believe in HIMACS and its performance. That's why **we guarantee our material for 15 years**, provided it has been processed by one of our Quality Club members. Hands on!

And we know that in everyday life you have to prove time and again that the materials you propose and use are really suitable for the intended use. That is why we are meticulous in providing you with the latest certificates and test reports to make life easier for you – and us! If you want to see a selection of the most needed documents, **check them out below**.
