HIMACS launches 5 new basins, blending aesthetics with inclusivity for all abilities

HIMACS PRM Series CB4628 basin

HIMACS CB4430 basin

When it comes to planning, designing or building a bathroom, whether it's for the domestic, retail, hospitality or healthcare sector, it's important to consider all aspects. This means creating a scheme that's ultra-hygienic, easy to clean, sleek and seamless while also ensuring it's fully inclusive for users both now and in the future.

With this in mind, HIMACS is proud to announce the launch of five new undermounted basins that offer creative solutions for bathroom planners, specifiers and architects, including two for inclusive design. The new basins include HIMACS PRM models that answer the demand for inclusive designs, combining style with practicality, aimed at users with reduced mobility as well as multi-generational households.

The new HIMACS CB4628 basin shown above is part of the PRM series along with the new CB5530 model below and both are an especially shallow basin with a design that allows wheelchair users to get extra close. *"We are extremely proud to be adding*

HIMACS

five new undermounted basins to our solid surface collection,” says Tim Lie, Product Manager at HIMACS. “The addition of two models created for persons with reduced mobility will allow planners and architects to create bathroom spaces that answer the need for inclusive design without sacrificing style.”

HIMACS PRM Series CB5530 basin

The new basins also include the CB452 as well as unique models, the CB4430 and the CB4530, which come with a solid surface valve designed to be flush fitted with the bottom of the basin. As well as its aesthetic qualities, HIMACS is also the perfect choice for basins and countertops thanks to its hygienic properties. It's resistant to bacteria, viruses and chemicals due to its scratch-proof, non-porous surface that prevents dirt, germs and bacteria getting in. Quick and thorough cleaning also ensures that cross-contamination doesn't stand a chance.

HIMACS

HIMACS PRM Series CB4628 basin

HIMACS PRM Series CB5530 basin

With its innate flexibility and special characteristics, HIMACS is the perfect choice for sleek and seamless basins. HIMACS is hardwearing, easy to clean and durable as well as resistant to wear and tear, scratches, stains and UV light. Its non-porous surface makes it extremely quick and easy to clean while its thermoformable properties also allow it to be moulded into any shape and size. The absence of visible seams also ensures a flawless finish that prevents dirt, bacteria and viruses building up on the surface. This makes HIMACS a Solid Surface material with unbeatable hygienic and clean air properties, guaranteed by certifications that comply with **LGA, NSF international standard and Greenguard.**

HIMACS Solid Surface

www.lxhausys.com/eu/himacs

HIMACS is a solid surface material that can be moulded into any shape. It is widely used for architectural and interior applications, such as sculptural and high-performance wall cladding or kitchen, bathroom and furniture surfaces, in commercial, residential and public space projects. It is composed of minerals, acrylic and natural pigments that come together to provide a smooth, non-porous and visually seamless surface which meets the highest standards for quality, aesthetics, fabrication, functionality and hygiene – offering many advantages over conventional materials.

HIMACS provides limitless possibilities for surfacing solutions and inspires creative minds from all over the world. **Zaha Hadid, Jean Nouvel, Rafael Moneo, Karim Rashid, Marcel Wanders** and **David Chipperfield**, among others, have completed fabulous projects using HIMACS.

At the forefront of innovation as always, LX Hausys recently introduced two new products. First, **HIMACS Ultra-Thermoforming**, an innovative formula that pushes the boundaries of solid surface shaping to a whole new level, with 30% more thermoplastic capabilities - the biggest innovation in the history of Solid Surface since its inception in 1967. And now, **HIMACS Intense Ultra** combines the characteristics from two disparate worlds: **Intense Colour Technology** and **Ultra-Thermoforming**.

HIMACS uses a simple heating process to give three-dimensional thermoplastic forming capabilities, allows visually seamless designs, offers a virtually limitless range of colours and – for some shades – exhibits a special translucency when exposed to light. Although HIMACS is almost as robust as stone, it can be worked in a similar way as wood: it can be sawn, routed, drilled or sanded.

HIMACS is made using a next-generation technology, the **thermal cure**. The temperature reached during the manufacturing process sets HIMACS apart from other solid surfaces and creates a denser surface that is even sturdier, more homogeneous and more durable, and with better resistance and superior thermoforming results.

HIMACS does not absorb humidity, is highly resistant to stains and is easy to clean, maintain and repair.

Countless internationally recognised certificates attest to the quality of HIMACS in terms of ecological commitment, hygiene and fire resistance – being the first Solid Surface in the market to receive the official **European Technical Approval (ETA) for façades** – for the Alpine White S728 colour.

HIMACS offers a 15-year warranty for products fabricated by a Quality Club Member.

HIMACS. The shape of your ideas.
